

Group Captain Smythe's Trail

The hunt is on

Oh dear, Group Captain Smythe has managed to lose his list of pilots and now can only rely on the radar for their identification. Worse still, his radar is showing 11 contacts and he is sure that he only has 10 pilots patrolling the skies. Has an enemy zeppelin infiltrated the airspace?

Your mission is to locate and identify all the planes on the radar screen and decode the information to identify the pilots flying them. Using the radar screen opposite as a guide you must locate the 10 friendly pilots and eliminate them from the radar list, the final contact will identify the pilot of the zeppelin.

Enter the Ornamental Garden and locate the 10 plaques hidden around it.

Each plaque will identify a pilot on the radar. Some names will be obvious, others will be hidden as anagrams or encoded.

When you identify a pilot cross them off of the radar list.

When you have found all 10 pilots, enter the zeppelin pilot's name onto the answer sheet located near the café and post it into the box. You could win your own name in chocolate and other chocolate goodies – from Choc-affair of York.
